

# 2021 SMART CONSTRUCTION CHALLENGE

**Leveraging IoT and Reality Capture to unleash productivity in construction sites**

## THE COMPETITION

As an industry leader in offering premium products and services to its customers, Hilti is continuously assessing the potential of new technologies to improve quality, productivity and health and safety in the construction industry.

This is your opportunity to innovate new approaches and concepts to pave the way for a more intelligent and efficient construction industry.

We will help you navigate around real-world challenges and needs in the construction industry, and build cutting-edge technological solutions to address them.

## WHO CAN PARTICIPATE

Experienced professionals as well as students from all around the world are encouraged to participate to not only display their innovative ideas but also pave a way to kick-start their career.

Applicants from diverse technological background are encouraged to participate.

Participation by interdisciplinary teams is highly encouraged.

## THE PRIZES

### **A hands-on experience**

The winners will receive a paid opportunity to further develop their prototype with Hilti, or they can become involved in other advanced technology initiatives of Hilti.

### **Fast-track Application Process**

All finalists will have access to a fast-track application process at Hilti.
